1. Comments

0003 The philosophy behind the conventions used in writing these documents is to choose those conventions that work.

2. Set theory

0004 We use Zermelo-Fraenkel set theory with the axiom of choice. See [Kun83]. We do not use universes (different from SGA4). We do not stress set-theoretic issues, but we make sure everything is correct (of course) and so we do not ignore them either.

3. Categories

0005 A category \mathcal{C} consists of a set of objects and, for each pair of objects, a set of morphisms between them. In other words, it is what is called a “small” category in other texts. We will use “big” categories (categories whose objects form a proper class) as well, but only those that are listed in Categories, Remark 2.2.

4. Algebra

0006 In these notes a ring is a commutative ring with a 1. Hence the category of rings has an initial object \mathbf{Z} and a final object $\{0\}$ (this is the unique ring where $1 = 0$). Modules are assumed unitary. See [Eis95].

5. Notation

055X The natural integers are elements of $\mathbf{N} = \{1, 2, 3, \dots\}$. The integers are elements of $\mathbf{Z} = \{\dots, -2, -1, 0, 1, 2, \dots\}$. The field of rational numbers is denoted \mathbf{Q} . The field of real numbers is denoted \mathbf{R} . The field of complex numbers is denoted \mathbf{C} .

6. Other chapters

- Preliminaries
- (1) Introduction
 - (2) Conventions
 - (3) Set Theory
 - (4) Categories
 - (5) Topology
 - (6) Sheaves on Spaces
 - (7) Sites and Sheaves
 - (8) Stacks
 - (9) Fields
 - (10) Commutative Algebra
 - (11) Brauer Groups
 - (12) Homological Algebra
 - (13) Derived Categories
 - (14) Simplicial Methods
 - (15) More on Algebra
 - (16) Smoothing Ring Maps
 - (17) Sheaves of Modules
 - (18) Modules on Sites
 - (19) Injectives
 - (20) Cohomology of Sheaves
 - (21) Cohomology on Sites
 - (22) Differential Graded Algebra
 - (23) Divided Power Algebra
 - (24) Hypercoverings
- Schemes
- (25) Schemes
 - (26) Constructions of Schemes
 - (27) Properties of Schemes
 - (28) Morphisms of Schemes
 - (29) Cohomology of Schemes
 - (30) Divisors
 - (31) Limits of Schemes
 - (32) Varieties
 - (33) Topologies on Schemes
 - (34) Descent
 - (35) Derived Categories of Schemes
 - (36) More on Morphisms
 - (37) More on Flatness
 - (38) Groupoid Schemes
 - (39) More on Groupoid Schemes
